Election/Restrictions

Page 2

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-7, 11 and 12, drawn to an object tracking system, classified in class 367, subclass 127.

II. Claims 8-10, drawn to a sensor device, classified in class 73, subclass649.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions of Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the object tracking system may utilize an active sensor device. The subcombination has separate utility such as a seismic sensor.
- 3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
